Now as eternal being I rescue other planets
And I don't know if it is alright to stack more than three blocks

VERSION: 2013-08-18-02

It's a game about a tiny eternal being rescuing planets by matching colored blocks. The way it deals with the blocks on a circular plane is pretty creative, actually, and I can see myself having a lot of fun with this.. YAWN!! What a boring game, its an even more boring version of tetris. I think the other review is from the guy who created it because its all wrong! I did not like this game at all, I've since deleted it.. Wonderful soundtrack. I just love singing with the Karaoke in the beginning. The game itself is truly amazing and quite easy to understand. I figured out how to play in the first 5 minutes. It's easy at first but it gets harder later in-game. There are different modes to help you out if you don't like one. If you don't like a mode, try the next!

Did I mention there's an epic soundtrack?. Combination of tetris meets match 3. Great for a casual 15 minute coffee break. The music and lo-fi graphics are pleasant and accelerate as the game progresses.. I love this game! Hoping for more levels and music.... Super cute game, great sound, creative game play, highly recommended!. Pretty awesome simple little arcade game, loads quick and has a great soundtrack so is a great thing to play when waiting or bored.

Cube and Star: An Arbitrary Love and Luxuria Supurbia had a baby.. A wonderful game, with amazing music, addicting gameplay, and a simple childlike charm to it, I love this game. It's like a mix between Tetris and bejeweled.. This game has all the things it shouldn't have:

\u2022 A lot of exploding and flying stuff.

\u2022 A lot of things happening without clear reason (I feel like sometimes blocks are disappearing, and maybe appearing on their own)

\u2022 Toys - what is this even for?

\u2022 Twitter support

\u2022 Lifes

While lacking things the game like this should have:

\u2022 Online scoreboard

\u2022 Decent help

\u2022 Clear rules

\u2022 A tutorial?

Basically its dr. mario with so much twists and effects that it's no longer easy to pick-up.. Fun puzzle game!

At first, the blocks go down in a very chill way, but the speed of the blocks will be in time higher, which makes the game harder. There is a way to make the blocks go slower, but this is not endless, which makes that at least I had to play on a really hard mode sometime, not being able to slow down the blocks for some time. After some time, it was possible again. :)

I really do like the concept of the game. :)

Also, who would give a game such name? Very funny. :P

If you have a Mac, like me, I recommend playing it on Windows. I didn't get my achievements while playing on Mac, I thought I read something about this that this is normal, not getting achievements on the Mac. So if you do like achievements, I recommend playing on Windows. Then you get the ones you deserve (AFTER you achieve them again)! :D

I recommend this puzzle game!. QbQbQb feels like one of those different puzzle games that tries something new.. In this case, players must clear blocks either by stacking three on top of one another, matching three that are next to each other, or even matching two that are across from each other. The twist (literally) is that the blocks fall onto a circular playing field and you have to direct them by spinning the planet. It's a very fun action puzzler and an addicting one too.. The music is also catchy and gets better depending on how good you're playing, which I love.. :) ..Only complaint is that there's no vs CPU option but it doesn't bother me that much..
